To Whom It May Concern,

I am writing to express my strong interest in senior-level Information Security and Cloud Architecture roles. I bring over 6 years of experience scaling enterprise cloud environments across GCP, Azure, and AWS, specializing in Zero-Trust architectures and security automation.

Rather than repeating my resume, here are the key highlights of my career:

Zero-Trust Cloud Architecture

- **GCP PAM & Tailscale:** Engineered Privileged Access Management as Infrastructure-as-Code ([Terraform](#)), transitioning legacy VPNs to encrypted, identity-aware networks.
- **Infrastructure Hardening:** Migrated 200+ workloads to Azure DevOps and configured secure hybrid networking for a 1,500-person global workforce.

Enterprise Compliance & Governance

- **ISO 27001 & SOC 2 Type II:** Led Stage-2 Surveillance Audits achieving re-certification with zero major non-conformities at [Osmos](#).
- **Automated TPRM:** Engineered LLM-powered knowledge bases to auto-answer vendor security questionnaires, cutting response times from days to hours.

DevSecOps & Supply Chain Security

- **Vulnerability Management:** Executed automated audits across 524+ code repositories, remediating critical CVEs and enforcing strict version pinning.
- **CI/CD Security Pipelines:** Integrated automated code review and scanning gates into GitHub Actions to block non-compliant code from merging.

I welcome the opportunity to discuss how my operational depth and compliance oversight align with your organization's goals. Thank you for your time and consideration.

Sincerely,

Chinmay Dhok
